

Job Description – Senior C++ Software Engineer

Exacq Technologies, Inc.

July 2010

Job Description

Exacq Technologies, a rapidly-growing manufacturer of IP video surveillance software and systems, is seeking to expand its software development staff. Highly skilled and motivated professionals are desired to ensure the continued development of robust, easy-to-use, and high performance video management products.

The Senior Software Engineer will play a significant role in the design and implementation of a cross-platform client-server video management system. This high-visibility position will be responsible for new functionality to keep the product current and expanding its market position.

Responsibilities include:

- C++ development of exacqVision Client, Server, or Web Server
- Lead requirements definition, design, and implementation of major new software features
- Support existing product functionality throughout lifecycle
- Test functionality across all operating systems (Mac, WinXP, Win7, Ubuntu 8.04, Ubuntu 10.04)

Required Skills/Qualifications:

- Experience with TCP/IP client-server application development
- Experience with Linux server applications
- 5+ years of C/C++ development
- BS/MS Degree in CS, EE, or relevant field

Other desirable skills:

- Experience with digital video
- Experience with Direct Draw and/or OpenGL
- Experience with cross platform development tools
