

Intelligent control where you need IT

## Advanced CCTV Security Management

### True Hybrid CCTV DVR

Seamlessly Mix Analog and IP Cameras

### Hardware Compression

Real-time Video on Every Camera

480 ips on 16 cameras

960 ips on 32 cameras

### IP Camera Ready

Add 8 additional IP cameras per server with no licensing fees or performance compromises

### Scalable

From one camera to hundreds

### Open Architecture

Interface with Video Analysis Software, Access Control Systems, and other devices

The exacqVision NDVR is a hybrid digital video recorder product designed for advanced CCTV security and surveillance applications that seamlessly merges real-time digitizing of analog cameras with IP cameras. ExacqVision NDVR is available in both 16-camera and 32-camera versions, packaged in a 2U-height rackmount chassis.

**Hardware Compression** – Advanced MPEG-4 ASP Compression enables Real-Time Video on every camera with watermarking

**Analog and IP Cameras** – Seamlessly mix any number and combination of analog cameras and IP cameras

**Completely Scalable** – exacqVision can be implemented from single-camera systems up to enterprise systems of hundreds of cameras

**Common User Interface for All Configurations** – Powerful, easy-to-use client software is common to IP-only configurations, all-analog configurations, hybrid configurations, and from one camera to hundreds of cameras.

**Powerful** – Simultaneous record, playback, & search

**POS/ATM Integration** – Text Insertion and indexing allow for POS & ATM video and transaction recording

**Extensive I/O** – 16/32 video inputs, 2/4 video outputs, alarm inputs and outputs, audio, serial ports for POS/ATM and PTZ, API for third-party integration

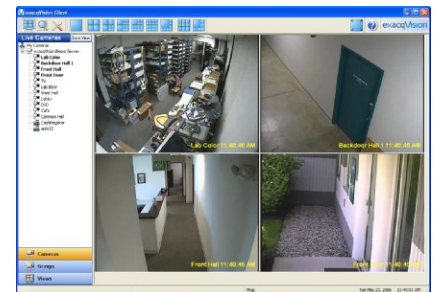

**Open Architecture** – Open API for third-party integration and interoperability

**Client-Server Design** – Highly Secure for Network Operation. Linux and Windows support for both client and server

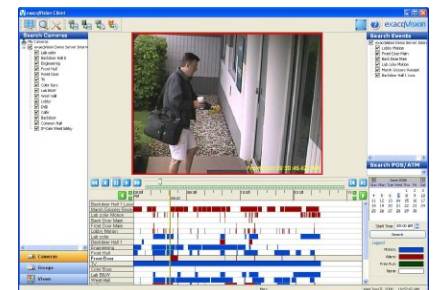

**High Resolution Video** – Select CIF, 2CIF or 4CIF (D1) for optimum image quality

### Easy-to-Use, Contemporary User Interface.

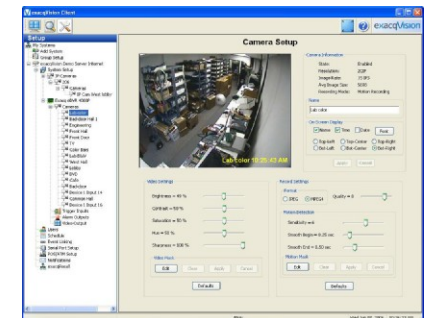

Common User Interface from one to hundreds of cameras. Customize camera groupings and views. Fully administer users and servers from any location. Intuitive look and feel.

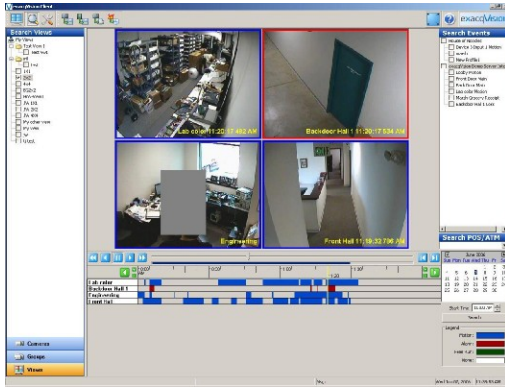

**Powerful Search**  
Graphical view of recorded activity allows for intuitive viewing of activity and playing of video. Search on motion, alarm, POS, ATM, Access Control, and more.

**Easy Setup**  
Easy and intuitive administration of users, servers, cameras, alarms, and external equipment. Client-Server architecture means administration can occur from any remote location.

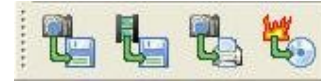

The powerful **Search** function provides graphical views of all activity by type (motion, alarm, etc), allows for quick review of any combination of cameras by rapid "scrubbing" forwards and backwards, allows for easy frame-accurate step-by-step both forwards and backwards, and easy tagging for later retrieval as well as exporting to DVD and CD.

Searched video can be exported to DVD or CD. The **exacqVision ePlayer** is also exported, allowing for the playback of video in the same way as the client sees it: simultaneous playback of multiple cameras in multiple views, further searching and exporting of video and still frames, and step-by-step frame-accurate advancing thru the video both forward and backwards.

Search on any selected **POS/ATM** string. Select certain strings for exception reporting. View video from selected cameras on POS/ATM search

Simple **Search Result Ribbon** enables quick saves of searched video: save image to disk, save video to disk, print image, and burn to CD/DVD

Intuitive **search playback** enables real-time smooth video play, fast-forward and fast-reverse, and step-by-step frame accurate movement both forward and backward.

In case of an incident, simply press the green **exacqRecall** button for automatic burning of selected cameras and player to CD/DVD to provide to enforcement officials.

The "scrubbing" feature provides a quick and easy way of rapidly cycling through video, both forward and backward, to jump to areas of interest.
